JACC Journals at ACC.26

JACC at ACC.26

Today, the *JACC* journals feature four timely investigations and an editorial spanning global risk prediction, hypertension therapeutics, acute myocardial infarction care, and cardio-oncology. In *JACC*, Laffin et al report results from the KARDINAL trial, evaluating the angiotensinogen-targeting therapy tonlamarsen in uncontrolled hypertension, while Kapur et al share pivotal findings from the STEMI-

DTU trial, demonstrating that left ventricular unloading before PCI does not reduce infarct size in anterior STEMI without shock. In *JACC: Asia's* Featured Clinical Research, Baskaran et al present the design of GPS-CAD, a landmark global initiative aimed at redefining pretest probability assessment for coronary artery disease across diverse populations, accompanied by an editorial from Yang and Xin underscoring its transformative potential. Finally, from *JACC: CardioOncology*, Sekhon et al detail a compelling cardio-oncology case of fulminant, right-ventricular–predominant immune checkpoint inhibitor myocarditis, emphasizing the importance of vigilance for atypical presentations.

Harlan M. Krumholz, MD, SM, FACC, FAHA
Editor-in-Chief, *JACC*

JACC

Left Ventricular Unloading in Anterior STEMI without Shock: The STEMI Door to Unload (DTU) Randomized Controlled Trial

ORIGINAL RESEARCH

Navin K. Kapur, MD, William O'Neill, MD, et. al.

10.1016/j.jacc.2026.03.071

Read More

Efficacy of Tonlamarsen in Patients with Uncontrolled Hypertension: The KARDINAL Phase 2 Randomized Clinical Trial

ORIGINAL RESEARCH

Luke J. Laffin, MD, Steven E. Nissen, et. al.

10.1016/j.jacc.2026.03.034

Read More

JACC: ASIA

Design and Rationale of GPS-CAD: Global Pretest Probability Study of Coronary Artery Disease

ORIGINAL RESEARCH

Lohendran Baskaran, MBBS, Pamela S. Douglas, MD, et. al.

10.1016/j.jacasi.2025.11.016

Read More

Revisiting Globalized CAD Risk Assessment in the Era of Artificial Intelligence

EDITORIAL COMMENT

Junjie Yang, MD, Ran Xin, MD

JACC: CARDIOONCOLOGY

Cardiogenic Shock from Chronic Immune Checkpoint Inhibitor Associated Myocarditis Causing Predominant Right Ventricular Failure

CLINICAL CASE CHALLENGES

Harveen Sekhon, M.D., Eric H. Yang, M.D., et. al.

10.1016/j.jaccao.2026.03.005

Read More

JACC: CARDIOVASCULAR INTERVENTIONS

Anticipating Landmark Outcomes Trials in Intermediate-Risk PE: Patient Selection and Implications for 2026 Guidelines

VIEWPOINT

Arman A. Shahriar, MD, Daniel J. Schimmel, MD, MS, et. al.

10.1016/j.jcin.2026.03.002
